PROFESSIONAL PROFILE

I am a backend developer with experience in Java, Spring Boot, and relational and non-relational databases. I am passionate about optimizing processes, designing scalable architectures, and delivering solutions that create real value within organizations.

WORK EXPERIENCE

Year 2025

CenfoEats – WebApp Recipe Generator with AI
Developer and QA
Role or achievement:
University project for the Project 3 course. Developed a web application that integrates artificial intelligence to generate personalized recipes based on user-selected ingredients. Includes an interactive map that allows users to explore traditional recipes from each country, enhancing the user experience through a dynamic and visual interface.

Year 2022

Veterinaria Moka – Veterinary Management System
Developer and QA
Role or achievement:
University project for the Project 1 course. Implemented a platform for appointment scheduling, patient management, and internal administration of a veterinary clinic. The system optimizes service management, medical history tracking, and veterinarian assignments through an intuitive and secure interface.
