Software Engineering student with hands-on experience in backend development, REST APIs, SQL, PowerShell, and Azure AD. Interested in cybersecurity and Identity & Access Management, with practical knowledge of OAuth 2.0, JWT, RBAC, and Active Directory concepts.

Academic Projects

CenfoEats – AI Recipe Generator Web Application (2025) **Developer and QA**

Developed a web application with secure authentication using JWT and OAuth 2.0 (Google), implementing Role-Based Access Control (RBAC) via Spring Security to manage user permissions and protect API endpoints. Used Angular for frontend and integrated a local AI model (Ollama) for recipe generation.

Network Infrastructure Lab – Virtualized Enterprise Environment (2024) **Systems Operating Course | Team Project**

Designed and deployed a virtualized enterprise network using VirtualBox and Windows Server 2019, implementing Active Directory (users, groups, OUs), Group Policy Objects (GPOs) for access control, a Certificate Authority (CA) for SSL certificate issuance, DNS, DHCP, IIS web server, and role-based shared folder permissions across organizational departments.
